

**BEFORE THE NEW MEXICO PUBLIC REGULATION COMMISSION**

**IN THE MATTER OF THE PETITION OF RENEWABLE )  
ENERGY INDUSTRIES ASSOCIATION OF NEW )  
MEXICO, THE COALITION FOR COMMUNITY SOLAR ) Docket No. 24-00263-UT  
ACCESS, AND PROSPERITY WORKS FOR VARIANCE )  
FROM PRIOR COMMISSION ORDER IN CASE NO. 23- )  
00369-UT )**

---

**ORDER GRANTING PETITION**

**THIS MATTER** comes before the New Mexico Public Regulation Commission (“Commission”) upon the Petition for Variance from Prior Commission Order in Case No. 23-00369-UT (“Petition”), filed by Renewable Energy Industries Association of New Mexico, the Coalition for Community Solar Access, and Prosperity Works (collectively, “Petitioners”).

The Commission finds that the Petition should be granted, as described below.

**JURISDICTION AND PROCEDURAL HISTORY**

1. The Commission has jurisdiction over this matter pursuant to Section 62-16B-7 of the Community Solar Act.<sup>1</sup>
2. On October 18, 2024, the Petitioners filed the Petition. The Petitioners request an extension of the deadline for complying with the requirement, in the Community Solar Act, that each community solar facility have no less than 30% of its capacity dedicated to low-income subscribers.<sup>2</sup> In Docket No. 23-00369-UT, the Commission granted a similar petition, varying from the deadline in the Community Solar Rule, 17.9.573 NMAC (“Rule”) and setting the deadline as “within 12 months of signing a valid interconnection agreement with the utility, or by the

---

<sup>1</sup> NMSA 1978, § 62-16B-7 (2021).

<sup>2</sup> NMSA 1978, § 62-16B-7(B)(3).

commercial operation date of the project, whichever is earlier.”<sup>3</sup> The Petitioners ask that the Commission grant an additional variance, which would result in a deadline of “the date of commercial operation of each community solar facility.”<sup>4</sup>

3. No responses to the Petition have been filed.

### DISCUSSION

4. In support of the Petition, the Petitioners argue that, “[t]he delay in receiving a final order in Case No. 23-00071-UT Phase II, In the Matter of the Tariffs, Agreements and Forms Proposed by Qualifying Utilities for the Community Solar Program (“Tariff Case”), has resulted in a shortened 12-month compliance period for enrolling all customers, including low-income customers, as that compliance period is defined by the [April 5<sup>th</sup> Order] . . . .”<sup>5</sup> The Petitioners further argue that the amount of the Community Solar Bill Credit (the “Credit”), to be determined in the Tariff Case, “will inform estimated subscriber costs and benefits, providing information necessary to commence enrollment.”<sup>6</sup>

5. The Petitioners add that, if subscriber organizations begin enrolling low-income customers after a final order is issued in the Tariff Order as late as November 2024, they will have only two months remaining until the expiration of the deadline. The Petitioners state that the first group of interconnection agreements were entered into in January 2024, and so, the 12-month compliance deadlines for the subscriber organizations that entered into these agreements are in January 2025.

6. In addition, the Petitioners argue that, as it is likely that some projects will not reach

<sup>4</sup> Petition (Oct. 18, 2024) at 18.

<sup>5</sup> Petition ¶ 2.

<sup>6</sup> Petition ¶ 2.

the stage of commercial operation until well after signing a valid interconnection agreement, “simply extending the deadline for enrollment to commence and conclude would not necessarily be well-aligned with project timelines and may necessitate a multitude of further variance requests.”<sup>7</sup> The Petitioners cite, as an example, any potential project that would require significant upgrades to the grid for interconnection.

7. The Petitioners assert that the deadline “is arbitrary because the beginning of the period doesn’t account for practical and legal impediments, and the end of the compliance period precisely 12-months after signing an interconnection agreement is without regard to any particular milestone, like commercial operation.”<sup>8</sup> The Petitioners further argue that nothing in the Act’s low-income subscription requirement “necessitates these prescriptive and restrictive parameters be placed upon the subscriber enrollment process.”<sup>9</sup>

8. The Petitioners argue that their request fulfills every requirement for granting a variance, pursuant to the Commission’s Rules of Procedure.<sup>10</sup> The Rules of Procedure provide, in relevant part, as follows:

- E.** A petition for variance shall:
- (1) identify the section of the rule or order from which the variance is requested;
  - (2) describe the situation that necessitates the variance;
  - (3) describe the effect of complying with the rule or order on the applicant if the variance is not granted;
  - (4) describe the result the variance will have if granted; and
  - (5) describe how the proposed alternative will achieve the purpose of the rule, and why it is in the public interest.<sup>11</sup>

9. Regarding the first requirement, Petitioners state that they are seeking a variance

---

<sup>7</sup> Petition ¶ 6.

<sup>8</sup> Petition ¶ 17.

<sup>9</sup> Petition ¶ 17.

<sup>10</sup> 1.2.2.4(E) NMAC.

<sup>11</sup> 1.2.2.4(E) NMAC.

from the requirement, in the April 5<sup>th</sup> Order, that each community solar subscriber organization must reach the required 30% level of low-income subscriptions within the earlier of 12 months of signing a valid interconnection agreement or the commercial operation date of the facility.

10. Regarding the second requirement, the Petitioners argue that the situation that necessitates the variance is “the inability of subscriber organizations to begin enrollment of community solar subscribers without approved community solar tariffs, resulting in a shortened 30% low-income subscription compliance period of less than 12 months after a signed interconnection agreement.”<sup>12</sup>

11. Regarding the third requirement, the Petitioners argue that, if the requested variance were not granted, “[s]ubscriber organizations would be placed in exactly the situation they were in that resulted in the Commission granting variances in Case No. 22-00020-UT and 23-00369-UT: they would not have 12 months to enroll low-income subscribers, due to no fault of their own.”<sup>13</sup>

12. Regarding the fourth requirement, the Petitioners argue that “[j]udicial economy, cost savings, and a potentially more flexible and optimal subscriber enrollment process would result from the granting of this request for a variance in full.”<sup>14</sup>

13. Regarding the fifth and final requirement, the Petitioners make the following arguments:

The proposed alternative would avoid imposing timelines for subscriber organizations to begin low-income customer enrollment before subscriber organizations have approved rates and tariffs, legally required disclosure forms, and any other unanticipated indispensable prerequisites to enrollment. The flexible alternative Petitioners are requesting is in the public interest because it would result in a thoughtful and orderly roll-out of Community Solar for low-income customers,

---

<sup>12</sup> Petition ¶ 40.

<sup>13</sup> Petition ¶ 41.

<sup>14</sup> Petition ¶ 42.

give the subscriber organizations discretion to pick the optimal time for signing up low-income subscribers, improve customer experience for low-income customers, it would not delay the benefits of community solar which will not arise until commercial operation, and it will reduce the need for further variance requests by addressing a known issue now (project delay), all of which is alleged herein.<sup>15</sup>

### **FINDINGS AND CONCLUSIONS**

14. The Commission finds that the variance requested by the Petitioners should be granted. The Petitioners have demonstrated compliance with the Commission's Rules of Procedure, and the Commission finds that granting the variance is in the public interest.

#### **IT IS THEREFORE ORDERED:**

- A. The Petition is GRANTED.
  - B. The deadline for each subscriber organization to comply with the 30% low-income subscription requirement is the date of commercial operation of each community solar facility.
  - C. This Order is effective when signed.
  - D. Copies of this Order shall be served on all persons listed on the attached Certificate of Service, via e-mail to those whose e-mail addresses are known, and otherwise via regular mail.
- In computing time in accordance with Statute, Regulation, or Commission Order, the computation shall begin on the date that the Order is filed with the Chief Clerk or Chief Clerk designee.
